Release Date: Dec. 2, 2010

Comal ISD has one of nation's first public school district apps

Comal ISD is proud to announce the district's new iPhone, iPad, and iPod touch app is now available to download from the iTunes store.

By downloading the application you can see the latest school district news, view phone numbers from every school in the district and dial them with the touch of a button, access important parent information such as breakfast and lunch menus and student handbooks, keep up to date with the results of some of the district's sporting events and stay informed of all the important events through the district calendar.

"We want to keep parents, students and the community informed," said Sandra Shelton, executive director of technology. "We continuously strive to make things more convenient, and this not only accomplishes that goal but it keeps up with our fast-paced technological world."

Comal ISD is one of the first districts in the country to have its own app. It was created through a partnership with Mobicip.com.

To download the app, simply go to the iTunes store through your mobile device or computer and search "Comal."
