ParentLink system to start calling with Cafeteria Balance information

Starting Feb. 25, Comal ISD parents will receive automated telephone reminders letting them know their children's cafeteria balances are getting low.

The phone calls, placed through the district's ParentLink notification system, will tell parents when:

- the student's cafeteria balance is less than \$1.20 (reduced-priced students)
- the elementary student's cafeteria balance is less than \$6 (full-priced students)
- the secondary student's balance is less than \$6.75 (full-priced students).

If parents want to "opt out" of receiving these reminder phone calls they simply need to notify their children's school in writing.

The ParentLink notification system has been used all year by Comal ISD and its campuses. Administrators have used it to report emergencies, absences, and other information to parents.

For more information contact your child's school or Cafeteria Manager.
